Dear Hiring Manager,

I am excited to apply for the Software Engineering Co-op position at Example Robotics. As a Computer Engineering co-op student at the University of Waterloo with hands-on experience shipping production web services, I am eager to contribute to a team building real-world robotics software.

In a recent internship I built a React and TypeScript dashboard used by over 2,000 internal users and wrote a Python service that ingested more than a million records a day behind a REST API. I care about writing clean, well-tested code: on that team I raised automated test coverage from 40% to 85% and caught two production-blocking bugs before release. These experiences taught me how to own a feature end to end and collaborate across teams.

I would welcome the chance to bring that same initiative to Example Robotics, and I would be glad to discuss how my background fits your needs. Thank you for your time and consideration.

Sincerely,

Jordan Goose
