EDUCATION

University of Waterloo — Waterloo, ON

Candidate for BAsC in Computer Engineering (Co-op), Expected 2028

Relevant coursework: Data Structures & Algorithms, Operating Systems, Databases, Linear Algebra

EXPERIENCE

Software Developer Intern, Example Tech Inc. — Toronto, ON (Winter 2026)

- Built a React + TypeScript dashboard used by 2,000+ internal users, cutting a manual report step from hours to minutes.
- Wrote a Python service that ingested 1M+ records/day and exposed a REST API consumed by three teams.
- Added automated tests that raised coverage from 40% to 85% and caught two production-blocking bugs.

Research Assistant, UW Example Lab — Waterloo, ON (Fall 2025)

- Prototyped a data-labeling tool in Node.js that sped up dataset preparation for a machine-learning project by 3x.

PROJECTS

CourseMatch — a class-scheduling web app (Next.js, PostgreSQL)

- Designed the schema and REST endpoints; deployed to a cloud host with CI on every push.

OpenWeather CLI — a small command-line weather tool (Python)

- Published as an installable package with a test suite and clear documentation.

SKILLS

Languages: Python, TypeScript/JavaScript, Java, C, SQL

Tools & frameworks: React, Node.js, Next.js, Git, Docker, PostgreSQL, Linux
